# Welcome to the Discovery Environment

A Simple Interface to Hundreds of Bioinformatics Apps, Powerful Computing, and Data

# Discovery Environment Overview

The costs of keeping up with technology

Image From: <http://theoatmeal.com/comics/apple>

# Discovery Environment Overview

Access your computational science through a single portal

# Discovery Environment Overview

## Benefits

### Get Science Done

- Use **hundreds** of bioinformatics Apps **without the command line**
- Add your own applications – an extensible, scalable platform

### Reproducibility

- Create and **publish Apps and workflows** so anyone can use them
- Analysis history and **provenance** – “avoid forensic bioinformatics”

### Productivity

- **High-performance computing** – not dependent on your hardware
- Manage a secure data repository and **share data easily**

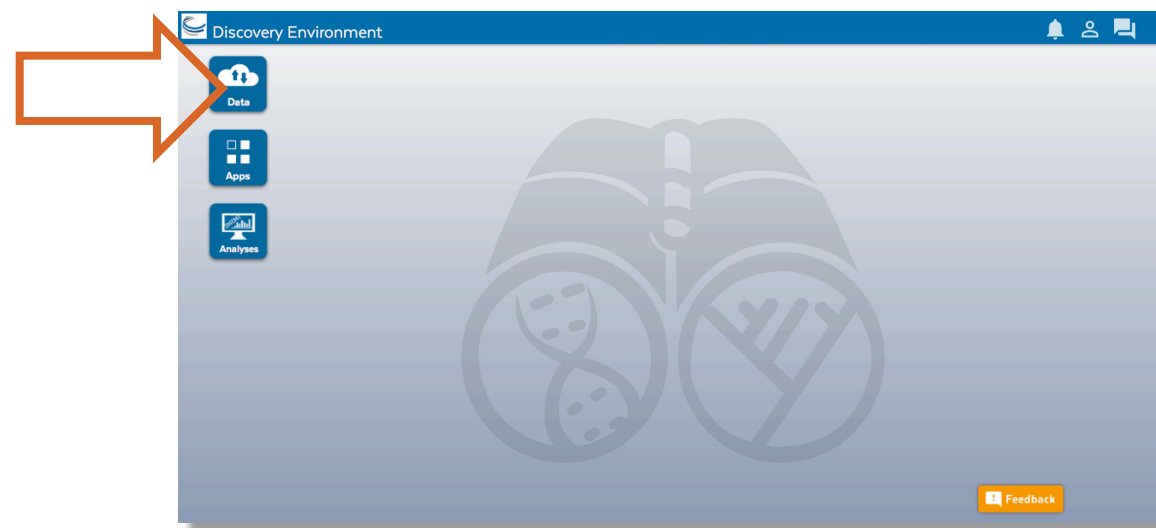

# Discovery Environment Overview

Manage data

## Data

- Upload / Download files and folders
- Share files via URL (Public Links)
- Share files/folders with other users

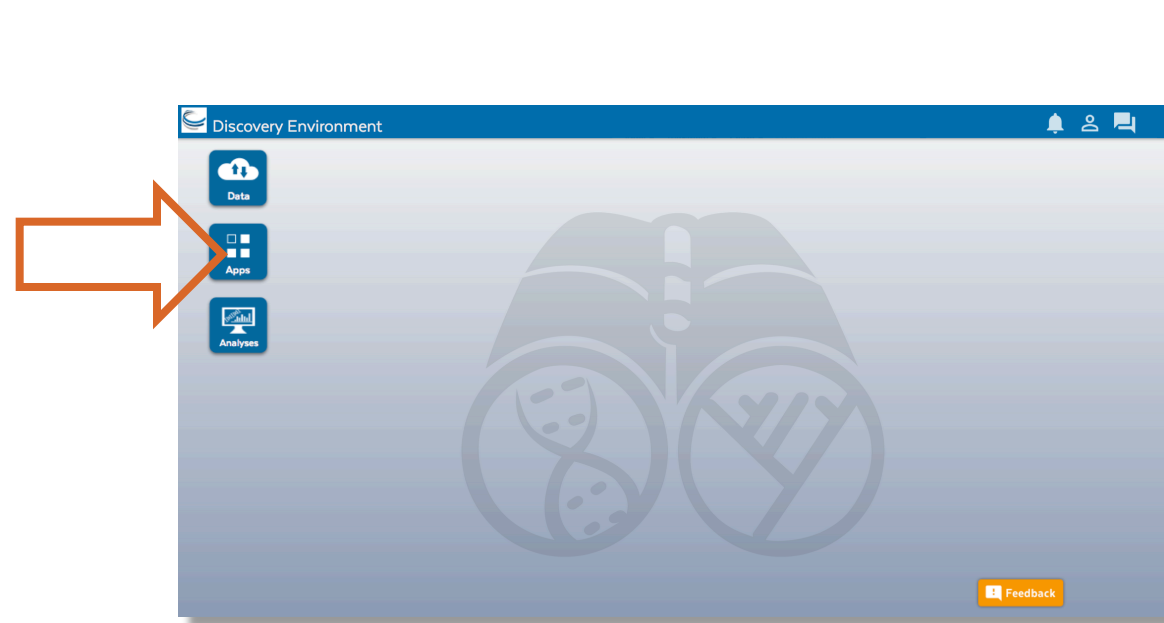

# Discovery Environment Overview

Analyze data and customize Applications

## Apps

- Run hundreds of bioinformatics Apps
- Build automated workflows
- Modify Apps or integrate new ones

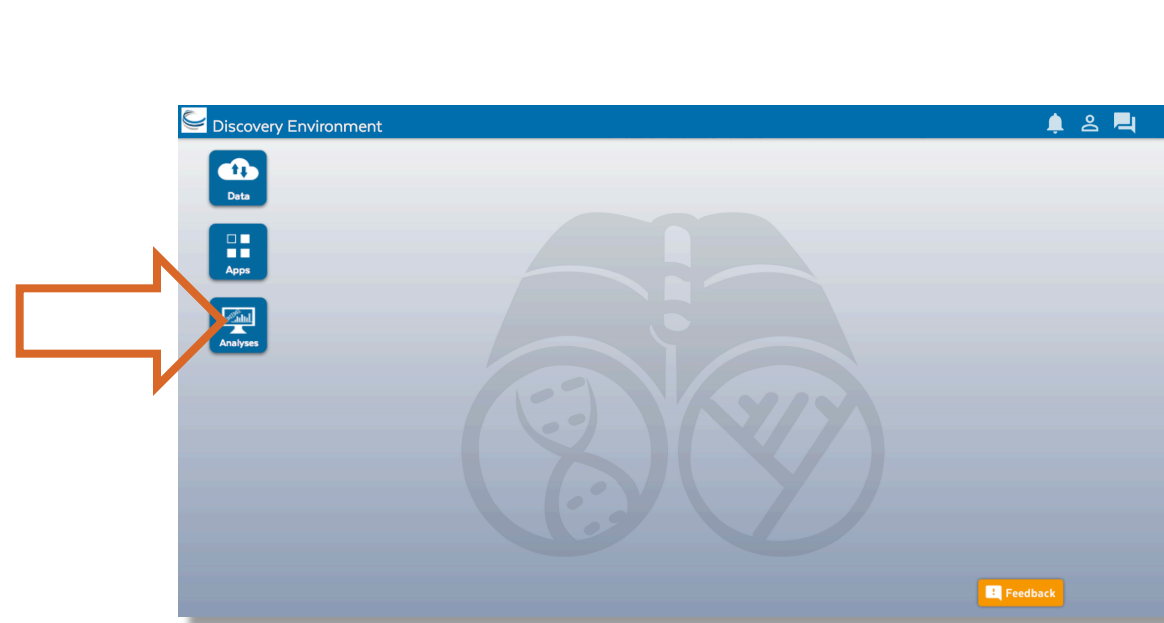

# Discovery Environment Overview

View history, find results, reproduce analyses, optimize parameters

## Analyses

- Monitor job status and find results
- Cancel jobs or re-launch jobs
- Detailed job history

# Discovery Environment Overview

Hands-on demo: Create a multiple alignment

**By the end of this demo you should be able to:**

- Navigate the components of the DE
- Access and manipulate data (upload, download, move, etc.)
- Run an analysis
- Track your analysis and see your results

# Discovery Environment Overview

Hands-on demo: Create a multiple alignment

1. Find a file in the Community Data folder
2. Download a small file of unaligned DNA sequences
3. Upload a small file

4. Use the MUSCLE App to align the sequences

5. Monitor the job status and export its parameters

6. View results

User perspectives and possible applications

Bench Scientist

- Does most of his data **uploads/downloads/sharing** here
- He pushes results from his lab's workflow into a common folder

Bioinformatician

- Installed an **HPC application** here so that anyone can use it
- Creates custom applications with default parameters exposed

Core Facilities

- Developed a workflow to QC and Filter reads for his users
- **Teaches about genome assembly** with examples in the DE

- Detailed instructions with videos, manuals, documentation in
- Keep asking: [ask.iplantcollabortive.org](http://ask.iplantcollabortive.org)

The screenshot shows the iPlant Collaborative 'Ask iPlant' website. The header includes the iPlant Collaborative logo, navigation links for 'Tags', 'People', and 'Badges', and options to 'Login with your iPlant ID', 'Register', and 'Help'. Below the header, there are navigation tabs for 'ALL' and 'UNANSWERED', a search bar with the text 'Search or ask a question', and an orange 'ASK YOUR QUESTION' button. The main content area displays a list of questions with sorting options: 'Sort by » by date by activity ▼ by answers by votes RSS'. Three questions are visible: 'TopHat settings for Arabidopsis' (0 votes, 1 answer, 3 views, 8 hours ago by rogerab), 'iDrop issue!' (0 votes, 1 answer, 7 views, May 21 '14 by sriram), and 'Java update - Windows8' (0 votes, 1 answer, 4 views, May 21 '14 by sriram). A 'Contributors' section on the right shows a grid of user avatars. At the bottom right, there is a 'Tags' section.
